A GREAT RECORD

Made by the United States in the Exportation

OF MANUFACTURED ARTICLES

More Than Doubled in the Last Six Years, and Eight Times Larger Than in 1860-The Respect in Which We Excel All Other Nations. An Interesting Array of Statistics.

WASHINGTON, D. C., June 25,-The remarkable growth in the exportation of manufactures has led to the preparation by the treasury bureau of statistics of a series of tables showing the value of each class of manufactures exported in each year during the past decade and the amount of each class sent to each country. By this process it is practicable to determine the trend of our foreign trade in manufactures. both as to the class of manufactures most demanded abroad and the countries which are proving our best custo-

That this subject is one which justifies a careful study is apparent in view of the fact that the exportation of manufactures has more than doubled in the last six years, more than trebled since 1880, more than quadrupled since is more than eight times as large as it was in 1860, and in 1898 and 1899 for the first time in our history exceeded the importation of manufactures. The exportation of manufactures in the fiscal year about to end will average more than one million dollars a day for each business day of the year.

A study of the figures which cover the details of the ten years' exportation of manufactures shows that the total value of our manufactures exported has increased 110 per cent in the decade, while an examination of the exportation of manufactures by other countries falls to show any considerable percentage of increase in any of them during the same period. Great Britain's exports of manufactures show no increase since 1890, the earliest year at which a separate statement of manufactures exported is obtainable, while her total exports of domestic products (of which manufactures form about 85 per cent), shows no increase in value in the decade 1888-97. From France the exports of manufactures show an increase of but 10 per cent in the decade 1887-96; Germany 13 per cent; Switzer-land 6 per cent; Netherlands 3 per cent; Austria-Hungary and Russia a loss, while, as above indicated, the exports of American manufactures in the decade 1889-98 show an increase of 110 per cent and in the year 1899 will be about three times that of 1879.

An examination of the details of our own exports of manufactures shows that it is in the production, manufacture and exportation of metals that we seem to excel. The history of ,na-tions and peoples shows that great classes of people frequently excel in certain industries, and the growth of our exportation, as well as our domestic production of manufactures seems to point to metals as our most successful line of work, at least at the present time. In 1883 manufactures of metals formed less than 20 per cent of our total exports of manufactures, while in 1898 they formed over 44 per cent. The increase in exportation of metals and manufactures thereof in the decade 1889-99 was 33 per cent, while the increase in the exportation of all manufactures in that time was but 110 per cent and the increase in exportation of manufactures other than those of metals during that time was but 55 per cent. In this estimate of the exportation of manufactures of metals only those articles composed exclusively of metals are included, those made up in part of metals, such as rallway cars, agricultural machinery, etc., being included among the other mnaufactures.

The rapid increase in the expertation of manufactures of metals is shown by the fact that the exports of brass and manufactures thereof in 1889 were but \$321,137 and in 1898, \$1,320,093; instruments for scientific purposes increased from \$1,023,238 to \$9,770,803, and in the ear about to end will reach nearly \$4,000,000; cycles, of which there were no exportations in 1889 amounted to \$6,846,629 in the exportations of 1898; clocks and watches increased from \$1,355,319 in 1889 to \$1,727,489 in 1898; zinc and manufactures thereof, from \$28,684 to \$1,339,668; copper and its manufactures from \$2,348,954 to \$32,180,872, and fron and steel, from \$21,156,077 in 1889 to \$70,406,885 in 1898, while in the fiscal year 1899, the total will exceed \$90,000,000.

Another interesting fact developed by an examination of the figures is that the European countries in which manufactures have long been established furnish as satisfactory a market for our manufactured goods as do countries where manufacturing has not yet been largely developed. In reapers and mowers, clocks and watches, sewing machines, bleycles, and the various manufactures of Iron and steel, and many other articles of the higher grades of manufacture, the European countries in which manufacturing plants and machinery, and skilled workmen abound, furnish a market for a large share of our exports, thus failing

GAIL BORDEN EAGLE BRAND

CONDENSED MILK HAS NO EQUAL AS AN INFANT FOOD. "INFAHT HEALTH"SENT FREE. ME GHOERSED MILK O

to justify the expressed fear that a deelopment of manufactures in countries where we are now seeking a foothold for our commerce would destroy their value as a permanent market.

NEW DEPARTMENT

Necessary Owing to our Increased

Interests Abroad.

NEW YORK, June 23.—A special to the Herald from Washington says: A new executive branch of the government with the title "Department Colonial Affairs and Foreign Commerce," or something similar to it, is deemed by the administration absolutely necessary to meet the new condi-tions which confront the United States as a result of the war with Spain.

A cabinet officer thus explains the necessity for such a department:

"At the present time there is no central head for the consideration of the multifarious questions constantly arising in connection with Cuba, Porto Rico, Hawaii and the Philippines. The war department has control of these matters now, but there are many questions which our army officers are not competent to deal with and ought not to be required to pass on. As matters go now, there is a disposition to shift from one department to another and from one bureau to another to escape responsibility for settling intricate and embarrassing questions."

West Virginia Pensions.

Special Dispatch to the Intelligencer.

WASHINGTON, D. C., June 25.—Pensions have been granted to West Virginia applicants as follows:

Increase-John K. Wilmoth, Kas \$17. to \$24; William T. Pinnick, Central City, \$8 to \$10; William Reis, Hurricane, \$10 to \$12; George W. Hall, Benwood, \$5 to \$8; James Dailey, Buckhannon, \$14 to \$24; George W. Taylor, Masontown, \$10 to \$17; Linville Blas, deceased (restor-ation and reissue) Hamlin, \$6 to \$12. Reissue-George W. Steinbeck, Alum

Bridge, \$12.

Dependent-Catharine Harkins, mother, Charleston, \$12.

New Postmasters.

Special Dispatch to the Intelligencer. WASHINGTON, D. C., June 25 .-Postmasters have been appointed in West Virginia as follows:

William C. Steele, Kedron, Upshur county; J. M. Garrett, Marion, Wetzel county; A. J. Zickefoose, Sellars, Upshur county; W. A. McDaniel, Enterprise, Harrison county; J. H. Coulter, Nickel's Mills, Monroe county; Joseph E. Wheatley, Wiggins, Summers

CONVINCING PROOF.

The Average Wheeling Citizen Must Accept the Following Proof.

The great Sir Isaac Newton, one of the most profound reasoners the world ever produced, once cut a large hole in a board fence to allow a favorite cat

ever produced, once cut a large hole in a board fence to allow a favorite cat access to two gardens, and cut a smaller hole to allow her kitten to follow her. The weakness manifested in Sir Isaac's action was due to want of thought. Any reader who mentally debates the proof offered here about Doan's Kidney Pills and arrives at any other conclusion than that stated in this citizen's statement is as short of reasoning powers as the philosopher when he turned carpenter.

Mr. W. S. Nelswanger, painter and decorator of No.28 South Wabash street, says: "My back was wenk for several years and I never got anything that gave me more than temporary relief. I always thought there must be something that would do the work for me and kept trying, so when I saw accounts of Doan's Kidney Pills I went to the Logan Drug company and got a box. I was well repaid, as they thoroughly rid me of my backache and made me feel better in every way."

Doan's Kidney Pills for sale by all dealers. Price 50 cents. Mulled by Foster-Milburn Co. Buffalo, N. V., sole agents for the United States. Remember the name—Doan's—and take no substitute.

A RARE OPPORTUNITY.

To Secure a Complete Set of Encyclo-

To Secure a Complete Set of Encyclopedia Britannica.

Frank Stanton is offering the public a fine chance to secure the Encyclopedia Britannica, complete in thirty superboctavo volumes. This includes the recent supplement of five volumes of particular interest to Americans.

For a short time this standard work is offered at 30 per cent less than it was sold by a leading Chicago daily poper and on easier terms.

The Encyclopedia Britannica is on exhibition in Frank Stanton's store, and they will be glad to show it to any one. If you cannot come in person, write them, and they will be glad to send you by mail full particulars about the work and the great offer of the above enterprising firm.

They have only a limited number of sets, however, and if interested, you should investigate at once.

SCHOOL MELANGE.

In preparing these notes, the last for the school year, the writer takes occasion to thank the Intelligencer for the courtesies extended to him during the year and for the generous treatment of the poorly penned articles, written on the educational topics of the day. It has been his aim to be fair in every respect and the only object in taking the time and the trouble to do the work has been the furtherance of the cause of education, especially in the schools of Wheeling, but generally throughout the state; hence, educational topics in general have been treated, and our schools from the university down have been noticed as the occasion was presented. One great hindrance to the full success of our schools has been the apathy of the patrons in general concerning them. Not that they oppose them, but they let them simply take care of themselves. The writer is convinced that the full success of our schools depends upon the hearty co-operation of teacher and parent and hence in these notes he has always urged upon the parent the necessity of paying more attention to the manner in which their children are being taught, i. e., assist the teacher in her work by their sympathy, if nothing more, and he further states that during the next school year he expects to have regular meetings of teachers and parents, i. e., joint meetings, if parents can be induced to attend. from the university down have been

In the last article written, the names of the valedictorian and the salutatorian were mentioned, and in a few pleas-ant words it was intimated that did the Eighth ward care to do so she might rejoice over the result. In say-ing this we did not intend to cast any reflection whatever on anyone else, and especially on the one mentioned as sal-utatorian. All who stand above 90 per-cent have surely done well and they de-serve credit for it. So the Pedagogue extends congratulations to the entire class, irrespective as to what school they come from, but he hears so often an expression that smacks so much of the "can anything good come out of Nazareth?" that he could not refrain from pleasantly referring to it; only this and nothing more. ian were mentioned, and in a few pleas-

The commencement exercises of the high school was surely a credit to the city of Wheeling, and Principal Work city of Wheeling, and Principal Work may well feel proud of the outcome of the year's work. The unfortunate ending of the valedictory need not worry the performer in the least, as she did nobly and she had the fullest sympathy of the entire audience. Her oration was one of the very best of the evening, and was well delivered throughout. All did well from first to last, while the singing was a feature of the occasion, especially the singing of the class song, the words of which were composed by Miss Isabella Jepson, the class salutatorian.

The report of Ritchie school for the month of June shows an enrollment of \$17, the smallest monthly enrollment of the year. This is very unfortunate for any school, but as far as known to the writer, it is the same with all the other schools of the city. Who is to blame for this? Undoubtedly, the parent. Pupils are allowed to stay at home as soon as the hot days come, but when the next term opens they expect to be allowed to take their places in the same class they left two or three months before school closed. This is not right. Parents should see to it that their children are punctual in attendance. If the compulsory school law was enforced as it is in other parts of our state, these things would not be so. To make any school a success, there must be punctual attendance, and it is hoped hereafter that there will be a more hearty co-operation of teacher and parent in \$17, the smallest monthly enrollment of operation of teacher and parent in this matter.

The closing performance of the eighth year pupils of Ritchie school yesterday morning was a very pleasant affair. The entire class, twenty-eight in num-ber, took part in the affair, fourteen having essays, while fourteen gave rec-liations. The programme was as fol-lows:

Wilson will take Mrs. Kain's place as superintend-ent of the annex building. All the oth-er teachers will serve next year. Miss Lula Ferguson will be the new teacher. THE PEDAGOGUE.

THE UNIVERSITY.

Board of Regents Adjourn Without Completing Their Work. Special Dispatch to the Intelligencer.

MORGANTOWN, W. Va., June 25. The board of regents of the university adjourned yesterday evening without completing any of the important work for which they convened. The election of a professor of history, a professor of domestic science, an assistant in the music school and one in the department of biology, was left to the president and president of the board of regents. Provisions were made for the immediate erection of the four buildings for which appropriation was made by the legislature. They will all be of stone as far as practicable.

One act of the board, the re-election of S. G. Chadwick as auditor, has caused some bad feeling. Captain W. J. White was auditor when the war with Spain broke out and he joined his regiment with the understanding, he says, that he was to have it when he returned. In the meantime Mr. Chadwick was given the position temporarily. When Captain White returned he was not reinstated and at the present meeting the board re-elected Chadwick notwithstanding a vigorous effort among White's friends in his behalf. The regents intimate that there are reasons why White was not put back, but refuse to give them. The state board of agriculture, which

has been in session here for several days, adjourned yesterday evening. A great deal of routine work was done and the discussions were interesting. The members are enthusiastic over the results of the institute work, which has been a feature for the past year, and arranged to extend the work along this line with the assistance of the ployes of the state experimental station. A. Lee Post, who was offered the fel-

lowship in chemistry at the university, has declined it and will accept a position in the Methodist Conference Seminary at Buckhannon, made vacant by the resignation of Prof. T. W. Haught Edwin B. Uline, Ph. D., of Harvard, who was elected an instructor in botany, has also declined the position.

A contract for a pipe organ in chapel hall at the university to cost \$6,000 has been let. Most of the money was raised by private subscription.

Pittsburgh Rallway Combine.

PITTSBURGH, Pa., June 23.—The Consolidated Traction Company, of this city, will not be absorbed by the American Railway Company as was ex-American Railway Company as was expected, but will be merged into the Philadelphia company, of this city. This announcement was confirmed here to-night by Judge James Reed, president of the Philadelphia company, and by President C. L. Magee, of the Consolidated Traction Company. The terms of the deal are said to be better for the Traction company those those offered by the American Railway Company, which were announced as \$49 for common and \$70 for preferred secured by bonds bearing 3½ per cent interest. The exact figures of the present deal cannot be given to-night.

Big Russian Order. PITTSBURGH, Pa., June 23.—The PITTSBURGH, Pa., June 23.—The Commercial Gazette says: "The Carnegie Steel Company has contracted with representatives of the Russian government to furnish that country with 180,000 tons of steel rails for its immense railroad enterprises in Siberia and China. This, it is said, is the largest order ever placed with one firm in the world and represents an outlay of between \$4,500,000 and \$5,000,000. In filling the order 200,000 tons of pig iron will be consumed and profitable employment will be insured to all the rail mill workers of the concern for the next two and a half years.

Members of the firm have refused to confirm or deny the above.

Remarkable Rescue

Remarkable Rescue.

Mrs. Michael Curtain, Plainfield, Ill.,
makes the statement, that she caught
cold, which settled on her lungs; she
was treated for a month by her family
physician, but grew worse. He told her
she was a hopeless victim of consumption and that no medicine would cure
her. Her druggist suggested Dr. King's
New Discovery for Consumption; she
bought a bottle and to her delight found
herself benefited from first dose. She
continued its use and after taking six
bottles, found herself sound and well; continued its use and after taking six bottles, found herself sound and well; now does her own housework, and is as well as she ever was. Free trial bottles of this Great Discovery at Logan Drug Co.'s drug store. Only 50 cents and \$100, every bottle guaranteed.

S. S. S. GOES TO THE BOTTOM.

Promptly Reaches the Seat demonstrates its superiority over other blood remedies. It matters not how obstinate the case, nor what other treatment or remedies have failed, S. S. S.

of all Blood Diseases and stinate the case, nor what other treaty ment or remedies have failed, S. 8. always promptly reaches and cures any disease where the blood is in any way involved. Everyone who has had experience with blood diseases knows that there are no ell-ments or troubles so obstinate and difficult to cure. Very few remedies claim to cure such real, deep-seated blood diseases as 8. 8. 8. cures, and none can offer such incontrovertible evidence of merit. 8. 8. 8. is not merely a tonio—it is a cure! It goes down to the very seat of all blood diseases, and gets at the foundation of the very worst case, and routs the poison from the system. It does not, like other remedies, dry up the poison and hide it from view temporarily, only to break forth again more violently than ever; S. 8. 8. forces out every trace of taint, and rids the system of it forever.

Mrs. T. W. Lee, Montgomery, Ala., writes: "Some years ago I was inoculated with poison by a nurse who infected my babe with blood taint. I was covered with sores and ulcers from head to foot, and in my great extremity I prayed to die. Several prominent physicians treated me, but all to no purpose. The mercury and potash which they gave me seemed to add fuel to the awful flame which was devouring me. I was advised by friends who had seen wonderful cures made by it, to try Swift's Specific. I improved from the start, as the medicine seemed to go direct to the cause of the trouble and force the poison out. Twenty bottles cured me completely." Swift's Specific.

S. S. S. FOR THE BLOOD

—is the only remedy that is guaranteed purely vegetable, and contains no mercury, potash, arsenic, or any other mineral or chemical. It never fails to cure Cancer, Eczema, Scrofula, Rheumatism, Contagious Blood Poison, Tetter, Boils, Carbuneles, Sores, etc.
